Nepean, K2H 6L3

Dear Mr. Mousseau:

Re:
D.O.B. /82

I am presently treating for multiple environmental allergies, including foods, dust, dust mites, molds, and several chemicals. The symptoms that result from these allergies include nasal congestion, irritable bowel, recurrent otitis media, and hyperactivity. He is responding very well to treatment. It is essential to his continued recovery that his exposure to aggravating allergens in his home and school environment be kept to a minimum.

Thank-you for your consideration in this matter.

Yours sincerely,

R. Mickelson
